Cisco Nexus* 7010 switches*

NET-ACCESS™ Switch and Server Cabinets

PANDUIT has revolutionized the data center cabinet with the addition of the NET-ACCESS™ Server Cabinet for an integrated network solution. Both NET-ACCESS™ Cabinets combine the aesthetics and security of a cabinet with the accessibility and cable management of an open rack:

- Optimized thermal management design ensures proper airflow for greater network reliability
- Innovative cable management organizes cables, improves airflow, and enhances network reliability
- Optional rear cooling door eliminates up to 20kW of heat in server cabinet for high density applications
- Integrated features simplify grounding to help protect equipment and personnel
- **NEW!** Optional overhead cable routing system provides a high capacity pathway that helps reduce installation costs while improving data center aesthetics

Specify NET-ACCESS™ Cabinets Today!

NET-ACCESS™ Cabinet has tested compatible with Cisco Nexus 7018, MDS* 9513, and Catalyst* 6509. Go to www.panduit.com/cisco1 for disclaimer.*
