

Dell PowerFlex with Long-Time Partner Panduit

Panduit power, connectivity, and rack solutions are optimized for Dell PowerFlex Rack to help customers consolidate and enable flexible and scalable IT. PowerFlex Racks are fully integrated engineered solutions and are designed for large numbers of virtualized and bare metal workloads.

Panduit is integrated with the Dell Intelligent Physical Infrastructure (IPI) solution. IPI provides comprehensive data and monitoring of door security, power, and thermals of the system. PowerFlex Rack is built in a factory with IPI pre-integrated.

Better Together, PowerFlex Rack IPI with Panduit Integration:

AGILITY

80% reduction in the time required to deploy physical infrastructure

CONSOLIDATION

Maximize consolidation, minimize footprint, and scale nodes with space and power in-mind

SUNSTAINABILITY

Power monitoring capabilities

SECURITY

An end-to-end secure environment for your mission-critical transactions and data

PERFORMANCE

99.9999% reliability

Experience the Advantage with Panduit Solutions

Leverage the same benefits of optimized Panduit solutions for PowerFlex Appliance and other Dell technologies. PowerFlex Appliance provides a smaller starting point with massive scale potential and brings your networking flexibility.

Thermal Switch Duct

Fiber Optic Cassettes

Security Handle

Power Distribution Unit

Accelerate your business transformation with Dell PowerFlex and Panduit.
